

Cake in a Cup

Generously spray inside of coffee cup with cooking spray. Empty contents of large packet into cup. Add 1 tbsp oil, 1 egg, and 1 tbsp of water to dry mix. Mix 15 seconds, carefully mixing in all the dry mix. Microwave on full power for 1-1/2 minutes (2 minutes for low wattage microwaves). While cake is cooking, place ingredients from "glaze mix" into a small container and add 1 tsp water. Mix well. When cake is done, pour glaze over cake in cup. Enjoy while warm!
